

Bird Netting Dubai

The Ultimate Bird Exclusion Solution for UAE Properties

Keyword: Bird Netting Dubai

birdcontroldubai.com

What Is Bird Netting?

Bird netting is a physical barrier system that completely prevents pest birds from entering a designated area. It is the most comprehensive bird control solution available and is widely used across Dubai for residential, commercial, and industrial properties.

Types of Bird Netting We Supply & Install

Net Type	Mesh Size	Best Application
Heavy Duty Knotted	50mm	Warehouses, factories
UV-Stabilized PP Net	19mm	Balconies, courtyards
Stainless Steel Mesh	25mm	Solar panels, vents
Garden Bird Net	16mm	Fruit trees, rooftop gardens
Transparent Nylon	19mm	Hotels, luxury residences

Why Bird Netting Is the #1 Choice for Dubai

- ✓ 100% bird exclusion — the most complete solution available

- ✓ UV-resistant and weatherproof — built for UAE's extreme heat
- ✓ Virtually invisible from a distance — maintains aesthetics
- ✓ Humane — birds are deterred, not harmed
- ✓ Covers large areas quickly and cost-effectively
- ✓ Suitable for pigeons, sparrows, mynahs and all pest birds

Top Applications in Dubai

Residential Balconies

Block pigeons from nesting on your balcony or terrace.

Warehouse Roofs

Keep pest birds out of industrial and storage facilities.

Courtyards & Atriums

Net overhead to create a completely bird-free zone.

Rooftop Gardens

Protect plants and landscaping from bird damage.

Parking Structures

Prevent droppings on vehicles in multi-story car parks.

HVAC & Mechanical Areas

Protect equipment from nesting and contamination.

Installation Guarantee

All our bird netting installations come with a written workmanship guarantee. We use only commercial-grade fixings and frames engineered to withstand Dubai's wind, heat and sandstorm conditions. Our installations last 5–10 years with minimal maintenance.
